

## How to set the Name Servers to AIOF from Godaddy.com

Once you have your AIOF account and wish to host your own domain instead of a subdomain name this PDF will give you directions on how to set the Name servers. Name servers have to be set in order for Godaddy to point the domain name to the hosting service. In other words in our case, to AIOF.

Step 1. record the name servers given to you in your email message from AIOF when you requested hosting service. (That service is part of the basic package)

Step 2. Log in to your Godaddy account. Note the sign in is at the top right corner of the Godaddy page when you go to <http://godaddy.com> . Login with your ID number and password.

**SETTINGS** | DNS ZONE FILE | CONTACTS

Auto-Renew ⓘ	Standard: On Extended: Off <a href="#">Manage</a>
Lock ⓘ	On <a href="#">Manage</a>
Nameservers ⓘ	NS1.AIOP-HOSTING.COM NS2.AIOP-HOSTING.COM Updated 12/30/2014 <a href="#">Manage</a>
Forwarding ⓘ	Domain: Off <a href="#">Manage</a> Subdomain: 0 subdomains forwarded

Find the Nameservers on the Domain Details page. To direct your domain name to AIOP use NS1.AIOP-HOSTING.COM AND NS2.AIOP-HOSTING.COM in this spot unless AIOP has sent you something different.

Click on Manage to change the nameservers.

# NAMESERVER SETTINGS

## YOURLINKTOPROSPERITY.COM

Nameservers point your domain to where it is located.

### SETUP TYPE:

- Standard  
Go Daddy hosting, forwarding, and parked domains.
- Custom  
Customizable nameserver settings.

### NAMESERVERS:

[EDIT NAMESERVERS](#)

#	Nameserver	Status
1	NS1.AIOP-HOSTING.COM	Active 
2	NS2.AIOP-HOSTING.COM	Active 

**ADD NAMESERVER**

**SAVE**

[Cancel](#)

Click on Edit Nameservers

### Edit Nameserver

#	Nameserver
1	<input type="text" value="NS1.AIOP-HOSTING.COM"/> 
2	<input type="text" value="NS2.AIOP-HOSTING.COM"/> 

**ADD NAMESERVER**

**OK**

[Cancel](#)

Type the correct nameserver in box 1 and box 2 and then click OK.

Then Click Save.

It could take 24 to 48 hours for the domain name to take effect.

Thank you,  
Dave
