

## How To Load(Copy) A Ready Made AIOP Shared Campaign by Dave Fullmer

This autoresponder feature is available to paid users of All In One Profits. Basic level users cannot create shared campaigns, just load (copy) Ready Made shared campaigns

When you join All In One Profits, you automatically receive an AIOP Response-autoresponder account based on your chosen user ID.

First of all, let's describe a campaign. Within that campaign, you can set up an autoresponder (a series of automatic follow up letters), create a sign up form and attach it to a lead capture page to lead prospects to your autoresponder and build your list. The lead capture page, also known as a squeeze page, is a webpage with a lead capture form with the purpose of creating interest and a call to action. That action by the prospect usually would be to submit their information to receive messages from your AutoResponder.

Your initial campaign is not set up with either pages nor does it have any messages in the AutoResponder. You have to install your own messages for whichever niche you wish to promote.

If you intend to promote AIOP, the company has provided a Ready Made Campaign with several splash and lead capture pages, and 19 messages installed in the autoresponder and shared it with all users. You can load (copy) the company ReadyMade campaign in your autoresponder account or it is possible to load a campaign from a sponsor or team leader that you may be following. This PDF shows you how to get your AIOP company Ready Made Campaign set up and have all your subscribers added to your own list.

First login to your back office and click on “AutoResponder”

**Add new campaign**

Note that the statement at the top tells me I am at my default page and the new AIOP campaign is listed at the bottom of my campaign list. It has the new campaign ID "AIOP" dot my user ID "davesAIOP @ AIOP Response and that identifies my campaign. To look at the messages in this newly loaded campaign, I would click on "GO" and then take a look at the whole campaign. Let's do that.

After you have Activated your campaign, (clicked on GO), first note the capture links that come with the loaded campaign.

It is a good idea to view the messages and check the correctness of them. You can also edit them, add in more messages, etc. but what you have already is a automatic email series that will send out messages for 32 days.

Editing Autoresponder messages will be covered in another tutorial.

This completes this tutorial and if you have questions or note errors, I would appreciate and welcome an email from you. Or if you just wish to connect with me, I welcome your contact.
